"Climate change is happening, humans are causing it, and I think this is perhaps the most serious environmental issue facing us" —Bill Nye (the Science Guy)

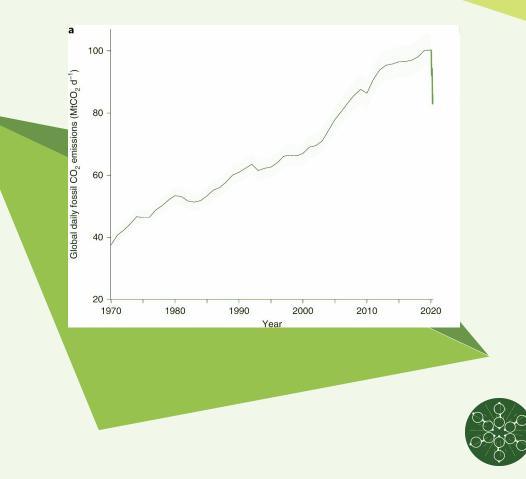

## and why it matters

## Global Daily Emissions

"Adding CO2 to the air is like throwing another blanket on the bed."

> - James Hansen, climatologist

## **People want change!**

# What about your emissions?

# 4.982

#### metric tons of CO2 per capita

# **Our** Solution?

Accountability! 02  $\square$ 1 03 **Estimate individual** Learn how to **Track daily** activities. **CO**<sub>2</sub> emissions. do better!

**x** =

## How will we do it?

### **Transportation**

Speed, GPS and step tracking can estimate emissions due to mobility

### Diet

Daily meat and dairy intake along with packaging can estimate this category

### **Purchases**

Emissions can be calculated based on country of origin and packaging

### Energy and Housing

An initial survey and hours at home per day could give a good baseline

# What about cheating?

## Hasn't this been done?

## Short answer: yes.

Long answer: not very successfully...

### Where we differ:

### **Isolated**

## Friends make it better!

### **Social**

Humans are naturally social beings, look at how much we love social media

### Competitive

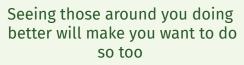

A simple leaderboard gets us wanting to do better, or at least better than

**Awareness** 

Team challenges, competitions and campaigns for greater incentive

## You track so many things...

## Why not this one?

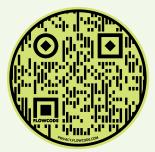

# We are just a bunch of geeks trying to change the world one user at a time.

## Thanks !
